EXPERIENCE

SLAC National Accelerator Laboratory — Web Designer

Apr 2022 - PRESENT

- Developed responsive website for LCLS's research projects, ensuring seamless performance across a variety of devices.
- Employed HTML, CSS, JavaScript, and design principles to optimize user experience across different browsers and platforms.
- Managed content updates on websites, including text, images, and multimedia elements using Drupal.
- Collaborated with diverse teams to gather project requirements, incorporating technical and scientific insights into design decisions.

IBM Quantum — UX Design Intern

Jun - Sep 2024

- Contributed to user-centered design and development of experiences for IBM Quantum's software and platforms in collaboration with UX designers and researchers.
- Conducted user research, including interviews and usability testing, to generate valuable insights guiding design choices.
- Created wireframes, prototypes, and user interfaces using Figma, focusing on intuitive navigation and visual aesthetics.
- Supported the implementation of design solutions by collaborating with developers and product managers, ensuring alignment with project objectives and user expectations.
